Technoprint Cheshire Ltd produces in-house design and manufacture of patient information leaflets and booklets for supply to the pharmaceutical and other markets, fully complying with the requirements of ISO 9001:2015, PS 9000:2016, ISO 14001:2015 and FSC-STD-40-004_V3-1.

Technoprint is committed to excellence in our service and assuring product security and recognises our responsibilities to the sustainability of the environment. It is the policy of Technoprint to conduct all aspects of our activities in accordance with approved, sustainable and acceptable quality and environmental practices, and operate within current legislations and the above standards.

In order to achieve this, we will encourage and instruct all staff to operate within the following guidelines:

- Maintain a hygienic, clean and controlled environment to prevent contamination
- Comply with all the legal requirements and other requirements of the above standards
- To minimise the consumption of natural resources and energy
- To consume material goods with consideration and in moderation
- To adopt working practices that will reduce waste and allow for the recycling of materials wherever and whenever possible
- To ensure that all waste, chemicals and effluent is disposed of safely, responsibly, and without unacceptable risk to the environment
- To encourage amongst all staff, clients and suppliers, an understanding of quality, environmental and sustainable considerations in the context of our business activities

Senior management are responsible for implementing this Policy and, as far as is reasonably practicable will ensure that:

- Any work carried out will comply with this Policy and current legislation and the Policy is reviewed every year, taking into consideration any audit findings
- The requirements of our standards and the protection of the environment are effectively communicated and firmly embedded in both the company's and all employees' culture
- We consider and assess best practice, acting where necessary to continuously improve quality, environmental and sustainable best practice
- Employees are educated, trained and motivated to carry out tasks to a high standard of Quality and in an environmentally responsible manner, ensuring that continuous improvement and professional development strategy remains core to our business goals. *We are committed to 100% of our staff trained in quality and environmental practices each year*
- We are committed to conserving water and energy by improving the energy and efficiency of our production process. *We are committed to reducing our overall carbon footprint by 50% from a 2023 baseline by 2030*
- Natural resources are used with consideration, particularly paper which forms the majority of our supply chain. *We are committed to having 90% of our paper and cardboard packaging materials from FSC® certified by 2030*
- Recycling of material is promoted. *We are committed to 90% of the waste generated in our site will be recycled or reused by 2030*
- Measures are taken to prevent any chemical surface and underground pollution or atmospheric pollution, with vehicle exhaust pollutants kept to a minimum. *We are committed to maintaining zero pollution incidents year on year*
- Wildlife and surrounding habitats, trees, flora and fauna are protected
